

*The fiscal year 2019 presented rewards and challenges to ASFC (Achieving Skills for Change). The challenges we experienced provided opportunities for our TEAM to explore ways to improve and remain viable. One of the rewards that we have experienced is seeing many children and adults in our care experience more positive lives at home and in the community.*

*ASFC is culturally diverse and has an appropriate mix of services to support individuals with a multitude of behavioral health needs. ASFC's DUI program, IOP Risk Reduction, and Substance Abuse programs will provide comprehensive assessments. As a National Defensive Driving provider, we can address the required drivers' classes not only in Georgia but nationally.*

*Our Gwinnett location offers services in 10 counties in the underserved north-eastern counties. As the needs of those we serve change, ASFC strives to provide leadership and direction in shaping a system of care to meet individual needs.*

*Our strategic growth plans for 2020 focus on improving client-centered services by providing a holistic one stop medical driven center. We sincerely appreciate the dedicated efforts of the stakeholders and partners who worked with ASFC in collaborating such a great transformation and for supporting the many activities designed to improve the quality of life of those we serve.*

*We are grateful to our TEAM who provides quality and effective services to address the needs of the many individuals and families who require treatment and support. As we move forward, we will continue our mission to foster recovery and resiliency for individuals and their families who experience a behavioral health challenge. We welcome suggestions that will help us better serve our community.*

*Sincerely,*

*AC Clark, CEO*
